EEP Africa is a financing facility for early-stage clean energy projects in Southern and East Africa. It is hosted and managed by the Nordic Development Fund (NDF) with funding from Austria, Finland and NDF.

Location
Uganda

Outcome and Impact
This project will demonstrate a circular economy model that improves the income of 4,000 small farmers, of which 50% are women. Affordable electricity will be provided to 75 households, public entities and C&I clients and cooking gas will be sold to 550 customers. By displacing diesel, wood and charcoal, the project expects to reduce 4,555 tonnes of CO₂e emissions per year and generate significant savings on energy-related costs.
