EEP Africa is a financing facility for early-stage clean energy projects in Southern and East Africa. It is hosted and managed by the Nordic Development Fund (NDF) with funding from Austria, Finland and NDF.

**Location**
Zimbabwe

**Outcome and Impact**
The project aims to install 500 solar egg incubators, the majority of which will have capacity for 99-144 eggs with a 250 W solar PV array and 1200 Wh battery capacity. The project will enhance access to productive use of energy for 2,100 people. Since the poultry value chain is predominantly comprised of women, the project will also provide income-generating opportunities for local women.
